

April 11, 1950

Miss Elise Cahn
108-26 65th Avenue
Forest Hills
New York, New York

Dear Miss Cahn:

I am enclosing blanks on which you may make application for a graduate assistantship. There are only a few positions still available for 1950-51 in both genetics and zoology, so in order that you can be considered you should send in the application as soon as possible.

You might indicate whether you prefer a teaching or research appointment in the event that there is a choice available. If you will send the application directly to me I'll see that it is considered by both genetics and zoology departments.

Sincerely yours,

James F. Crow
Assistant Professor of Genetics
